ARIELTECH[®]
MANUFACTURERS OF THERMAL MANAGEMENT SOLUTIONS
 Industry leading manufacturer of Thermal Management Solutions for Control Panels and Electrical Enclosures

Quality fixing and fastening solutions. From design to installation to inspection. Trust nVent CADDY to deliver productivity with safe, fast and easy products.

Leader in protecting structures, equipment and people in the commercial, telecom, utility, and industrial markets. Engineered solutions and quality products provide reliable protection from the ground up through grounding and bonding, surge protection and lightning protection.

Low voltage power and grounding connections for OEMs, panel builders and targeted industries. Leading products, including distribution/power blocks, no lug grounding/bond braids, insulators, and flexible braids, shunts and low space high ampacity flexible busbar.

Floor Heating Systems ideal room specific heat source options for both new construction or renovation projects. Heat Tracing solutions that keep people and infrastructure safe from harm, enhance building performance, and bring comfort into the home.

Protect people, processes and critical electrical circuits during a fire or other emergency with nVent PYROTENAX System 1850 mineral insulated fire two-hour fire-rated cables. A specialty wire used to power emergency response equipment such as fire pumps, fire fighter elevators, smoke extraction fans, backup generators and more.

Commercial: Quality solutions for winter safety, comfort and performance to building and infrastructure design, construction, operation and maintenance professionals.

Industrial: Advanced heat tracing solutions for the general process, oil and gas, chemical, and power generation industries. Global solutions expert in high quality electric heat management systems with the ability to provide engineering design services, procurement and fabrication, site services and post installation services anywhere in the world.

From concept to delivery and during operations: Tracer will optimize your heat tracing projects for timing, budget and scope with a fully integrated approach.

CurrentLeak™ is your number one defense for electrical fires caused by ground faults!
